MedyRobot

MedyRobot connects to the Pharmacy Robot and allows the distribution of the product present in the Robot **automatically, quickly and effectively.** Medyrobot connects directly to the management software of the pharmacy and it will benefit from the services that will be developed in the future.

MedyBOX services

HELP DESK & TECHNICAL ASSISTANCE

Assistance included throughout the year

MedyBox offers all-inclusive solutions with online and on-site technical and management assistance to guarantee to its customers efficiency and sales continuity on the products purchased.

*Warranty on the spare parts only**

Sales control

Through the web interface, the pharmacist can have a **real-time “screenshot”** of the performance of the vending machine both on a **technical** and **commercial** level with:

- Inventory control
- Alarm management
- Temperature monitor
- Sales statistics
- Product configuration
- Prices and offers management

CONSULTING

Layouts processing

Over 20 years of experience in the sector have allowed us to acquire the expertise to advise the customer by identifying the **best products to insert inside the vending machine**.

Based on statistics and focused studies, Medybox layouts give the possibility to have an **ordered subdivision of product** categories and a better relationship between the number of products and available space.

NEW

2023
